PROFESSIONAL SUMMARY

Cyber security graduate (Master of Cyber Security, Deakin) and CompTIA Security+ certified SOC analyst with hands-on experience in alert triage, incident response, SIEM monitoring, and threat detection. Deployed and operated IDS/IPS, WAF, and EDR solutions across home lab environments, with working knowledge of Splunk, Wazuh, and Microsoft Sentinel. Proficient in MITRE ATT&CK, NIST CSF, and ISO 27001, with ITIL-aligned incident and service request experience from IT support. Seeking a SOC Analyst or Security Operations role.

TECHNICAL SKILLS

SIEM & Detection: Splunk, Wazuh, Microsoft Sentinel (Microsoft SC-200 in progress), log analysis, alert triage, threat detection, incident response

Endpoint & Network Security: IDS/IPS, EDR, Microsoft Defender, CrowdStrike (familiar), Nessus, Nmap, Wireshark, pfSense, WAF, firewalls

Offensive & Analysis Tools: Burp Suite, Metasploit, Shodan, DVWA

Frameworks: MITRE ATT&CK, NIST CSF, ISO 27001, OWASP Top 10, ITIL

OS & Networking: Windows, Linux (Kali, Ubuntu), macOS, TCP/IP, DNS, HTTPS, SSL/TLS, SSH

Scripting: Python, Bash

EXPERIENCE

Cyber Security Research Analyst, Hardhat Enterprises (Deakin Capstone) Jun 2023 - Oct 2023

- Led a 5-member team through 20+ malware analyses, owning the roadmap and delivering on every milestone.
- Built a visual analytics platform for malware classification and IOC identification across 100+ samples, correlating outputs from multiple antivirus engines to surface indicators of compromise.
- Presented findings to industry supervisors, turning technical detail into actionable conclusions.

Junior Analyst, Hardhat Enterprises (Deakin Capstone) Mar 2023 - May 2023

- Supported the Fortify initiative, connecting IT professionals with small businesses to strengthen their security posture.
- Built a platform matching business with security volunteers, including a monitoring dashboard to track partnership activity.
- Gathered and clarified requirements from non-technical stakeholders to keep deliverables aligned with business needs.

IT Support Analyst, Flybuys (Probe CX), Melbourne Nov 2022 - Jul 2023

- Resolved 60-80+ technical and account access issues daily across customer-facing systems, maintaining a 90-95% satisfaction rating.
- Diagnosed, triaged, and escalated complex incidents with clear, structured documentation, reducing investigation time for Tier 2 teams.
- Troubleshoot login, authentication, and account configuration problems while consistently meeting service-level agreements (SLAs).

Retail Team Member, Woolworths, Geelong Apr 2024 - Present

- Process 150+ online orders daily in a fast-paced environment, consistently hitting accuracy and turnaround targets under time pressure.
- Coordinate with in-store and delivery teams to keep fulfilment on schedule, demonstrating reliability, ownership, and initiative.

TECHNICAL PROJECTS

SOC Home Lab - Wazuh SIEM & Endpoint Monitoring

Wazuh, Ubuntu Server, Kali Linux, VMware Fusion (ARM64)

- Deployed a Wazuh SIEM (manager, indexer, dashboard) on Ubuntu and enrolled a Kali Linux endpoint as an agent; monitored authentication, sudo, and session events through the dashboard for investigation and alert triage.
- Configured real-time File Integrity Monitoring and traced the alert pipeline through ossec.log and alerts.json to identify and close detection gaps.
- Integrated Suricata IDS/IPS with MITRE ATT&CK technique mapping for enriched detection coverage and network-level threat visibility.

Endpoint Protection & Firewall Configuration

Windows Defender · pfSense · Snort · Nessus

- Configured Windows Defender endpoint protection policies and 20+ pfSense firewall rules for ingress/egress traffic control, with IDS/IPS enabled to detect and block suspicious activity.
- Deployed Snort for deep packet inspection and integrated Nessus for vulnerability scanning, identifying and remediating vulnerabilities across the environment.
- Monitored 100+ system logs and firewall alerts weekly, conducting root cause analysis on security events and triaging findings by severity.

Web Application Firewall Home Lab - Attack & Defence

SafeLine WAF, DVWA, Apache, MySQL, Kali Linux, Ubuntu (ARM64)

- Simulated SQL injection, XSS, and command-injection attacks against a DVWA target, then deployed SafeLine WAF as a reverse proxy and confirmed all attacks were blocked and logged demonstrating both offensive awareness and defensive implementation.
- Configured rate limiting and validated HTTP flood protection via a 500-request load test; diagnosed and resolved a MySQL 8.4 compatibility bug through Apache and database error log analysis.

EDUCATION

ACS Professional Year, Performance Education	Oct 2025 - Present
Master of Cyber Security, Deakin University (WAM 75/100)	Nov 2022 - Sep 2024
Bachelor of Electronics Engineering, Mumbai University	Jul 2018 - Jul 2022

CERTIFICATIONS

• In progress: Microsoft SC-200 (Security Operations Analyst)	
• CompTIA Security+ (SY0-701)	Sep 2025
• Microsoft SC-900: Security, Compliance & Identity Fundamentals	Jul 2023
• Google Cybersecurity Specialization	Dec 2024
• EC-Council Certified Application Security Engineer (CASE - Java)	Sep 2023
• ANZ Cybersecurity Job Simulation	Jul 2024
• Telstra Cybersecurity Job Simulation	Jan 2024
